

THE STRENGTH TO HANDLE ANY TYPE OF STAIN!

Pool Stain Treat has the strength to remove stains from any kind of Swimming Pool

Pool Stain Treat is a patented pool stain remover that has the strength to work on any type of stain on every kind of pool surface.

Pool Stain Treat is a powerful chelator and sequestering agent, able to dissolve metals that have stained your pool to dissolve away back into the water. Pool Stain Treat works independent of pH and chlorine levels making it easy to use.

Simply add one bottle of Pool Stain Treat per 20,000 gallons to your pool in the affected area and watch the stains disappear. Pool Stain Treat continues to work for up to 60 days keeping metals water soluble and preventing future stains.

Pool Stain Treat is the most trusted stain remover in the Pool Industry because of its ability to remove the toughest pool stains.

Chemical Type: Granular

Available Packaging: 2 lbs. bottles, 4 ounce "Spotting Bag"

Dosage Rate: 2lbs. per 20,000 gallons of pool water

Frequently Asked Questions

Q: How does Pool Stain Treat® remove and prevent stains?

A: Pool Stain Treat® is patented chelator and sequestriant. This means Pool Stain Treat® dissolves stains of the surface of your pool. It then "traps" the stain causing metals in your water to prevent them from coming back.

Q: What types of stains will it remove?

A: Pool Stain Treat® is effective on all types of mineral/metal stains. 99% of stains on pool surfaces are from metal in pool water dropping out and reacting to the surface of the pool. Pool Stain Treat® reverses this – pulling the metals of the surface of your pool and removing the stain.

Q: How quickly will Pool Stain Treat® remove the stain?

A: This depends on a number of factors, such as the type of stain, type of surface, etc. However, customers have reported seeing results anywhere from several minutes to 24 hours.

Q: What types of pool surfaces will Pool Stain Treat® work on?

A: Pool Stain Treat® is safe and effective for every type of pool surface, be it plaster, vinyl, or fiberglass. We do recommend that if using on a colored plaster surface that you pre-dissolve Pool Stain Treat® to prevent streaking.
