

# ULTRA GIZZMO<sup>®</sup> protects your pipes and skimmer from winter ice damage.

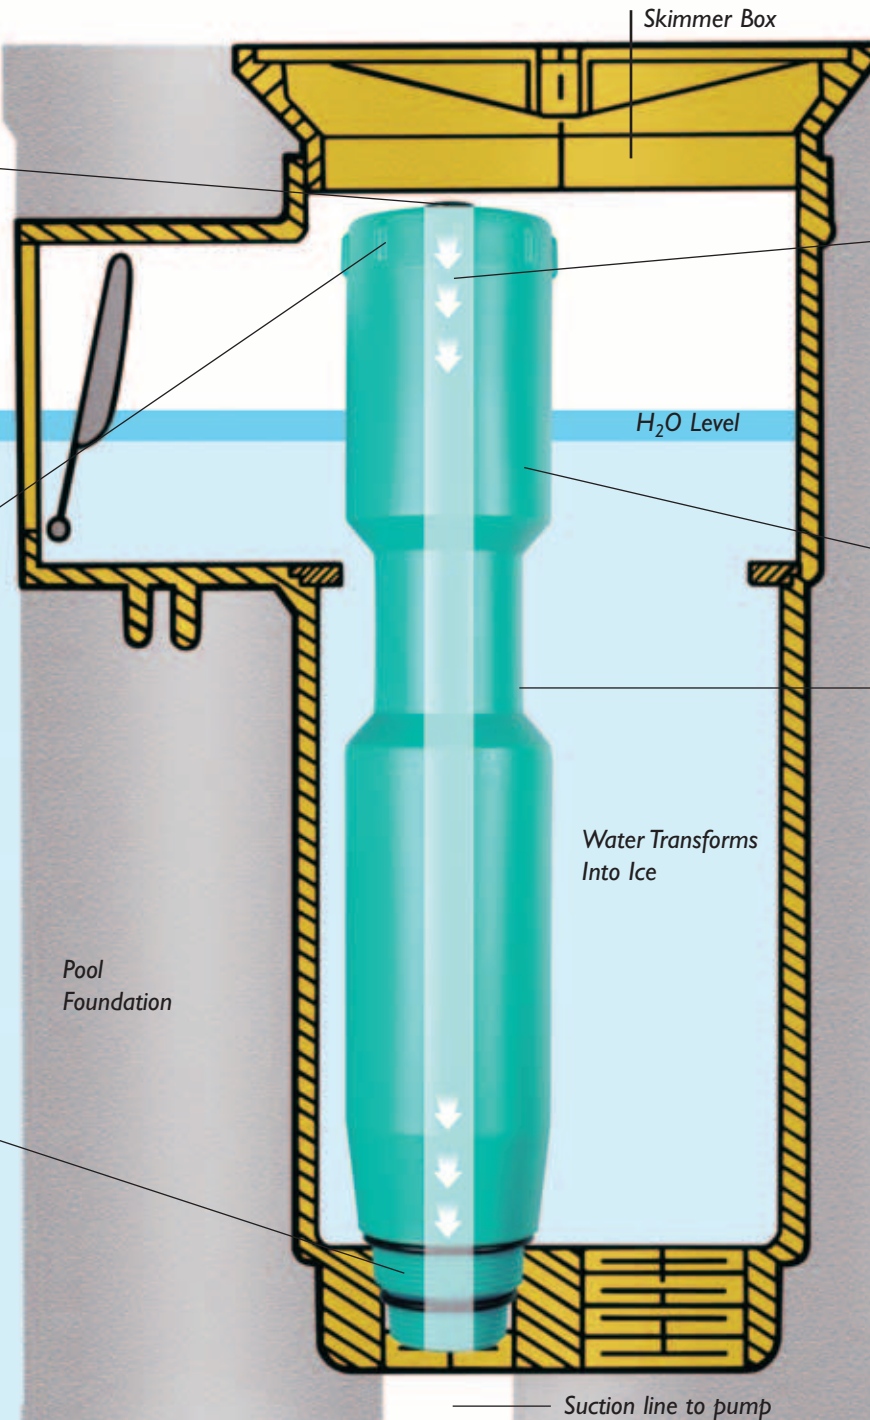

■ **Sturdy plastic plug** ensures tight closure of blow-out tube.

■ **Lug-style hand grip** for easy grab 'n' turn.

■ **Two sets of threads (1.5" or 2.0") with rubber O-rings** create a secure seal against water leaks.

## Use the unique, internal blow-out tube to expel H<sub>2</sub>O

1. Remove plastic plug
2. Thread **ULTRA GIZZMO<sup>®</sup>** into pipe
3. Blow air through the tube\*
4. Securely reinstall plastic plug

\* Air can be introduced to clear lines from the top of the **ULTRA GIZZMO<sup>®</sup>** or from the pump

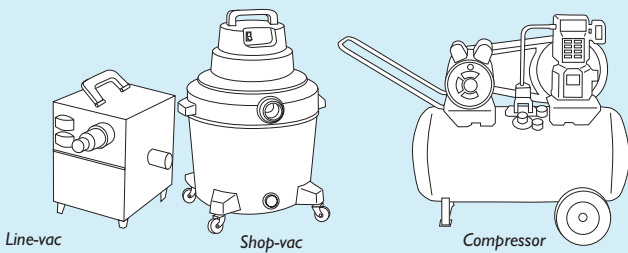

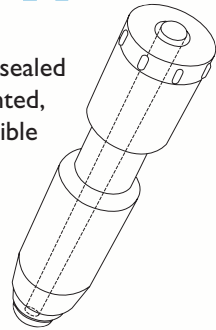

- **Hermetically-sealed internal air space** between the outer wall and the tube creates a flexible cushion to absorb ice expansion.
- **Tapered waist** accommodates skimmer basket ring.

## IT'S SIMPLE

- **Easy to operate**  
*Takes just minutes to install*
- **Unique inner tube**  
*No need to lower water levels*
- **Water Conservation**  
*Environmentally Safe*
- **Patented features**  
*Authentic, Original Manufacturer*

# PATENTED DESIGN

**ULTRA GIZZMO®** uses the unique sealed cushion of air combined with a patented, integral blowout tube, making it possible to use the **ULTRA GIZZMO®** as a suction line extension to blow filter lines clear without lowering the water level in the pool.

**ULTRA GIZZMO®** is designed to operate using a Line-Vac or other similar blowing device. In the case of compressed air, the black plug can be retrofit with a valve system.

- **Winterize Pipes + Skimmer**  
*a single unit prevents ice damage*
- **No More Draining the Pool\***  
*protect the environment and save time!*
- **Less Cover Sagging and Pulling**  
*keeping the H2O level up prolongs the life of the pool cover*

\* No tiles, no draining. If you DO have tiles, lower water-level to below the skimmer.

# PROTECT YOUR INVESTMENT

**Save water. Save time. Save your pool.**

**ULTRA GIZZMO®** is a low-cost solution to protect the investment of your swimming pool...It just makes sense!
